Douglas A. Goodman, Chief
Date: January 20, 2010

The Ashland Police Department has been contacted by CSX senior management and advised that the rail work project affecting the England Street, Myrtle Street and College Avenue crossings will continue on Thursday, January 21, 2010 at 9:00 am until completion, which is anticipated to be sometime before 5:00 pm that same evening. We will continue to assist CSX with traffic control for this project so that we may minimize the impact it will have on those traveling through this area.

We will continue to deliver updates as soon as we receive them. We appreciate the continued patience of our community as we try to minimize the impacts of this rail project.
